Geochim. et Cosmochim. Acta

EDITORS

DR. L. H. AHRENS, *Department of Geology and Mineralogy, The University, Oxford, England.*

PROF. C. W. CORRENS, *Sedimentpetrographisches Institut der Universität, Lotzestr. 13, Göttingen, British Zone, Germany.*

DR. E. INGERSON, *United States Department of the Interior, U.S. Geological Survey, Washington 25, D.C., U.S.A.*

DR. S. R. NOCKOLDS, *Department of Mineralogy and Petrology, The University, Cambridge, England.*

PROF. F. A. PANETH, F.R.S., *Max-Planck-Institut für Chemie, Mainz, Saarstrasse 23, Germany.*

PROF. L. R. WAGER, F.R.S., *Department of Geology and Mineralogy, The University, Oxford, England.*

PROF. F. E. WICKMAN, *Naturhistoriska Riksmuseets, Mineralogiska Avdelning, Stockholm 50, Sweden.*

I. GENERAL

1. Papers on Geochemistry should be submitted to the editors for the appropriate country or language (*Papers on Cosmochemistry should be sent to Prof. F. A. Paneth, F.R.S.*). Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. The preparation of progress reports and review articles will be invited by the Editors from time to time. The Journal will appear as independent and complete numbers, which will be sold separately and combined into volumes of about 300 pages.

2. Only papers which have not been previously published will be accepted. The publishers retain exclusive publication rights for all papers in all languages and countries, on acceptance and until the 31st December of the year following the year when the printed paper appears. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta.*

3. 75 free reprints of each paper are provided. Additional copies can be purchased if ordered at the time the first proofs are returned.

II. MANUSCRIPT REQUIREMENTS

1. The manuscript must be written in one of the three official languages, English, French, or German.

2. The manuscript should be an original typewritten copy (not a carbon). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Half-tone illustrations should be restricted to the minimum necessary. They should accompany the manuscript mounted on separate sheets. Line drawings that require to be re-drawn should include all relevant details. Photographs should be enlarged sufficiently to permit their clear reproduction in half-tone. If words or numbers appear in photographs, two copies are requested, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should accompany the manuscript on a separate sheet.

4. Only such references to literature should be given as are referred to in the text and should be denoted by quoting the author's name and date of publication, e.g. AHRENS (1952). Literature references are to be listed together at the end of the manuscript and not given as footnotes. All references should be listed alphabetically according to the Harvard system:

AHRENS, L. H. (1952) Geochim. et Cosmochim. Acta **2**, 168

and should include the standard abbreviated title of the journal, year, volume number and page number.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

No. 1

Page

E. A. Vincent and R. Phillips: Iron-titanium oxide minerals in layered gabbros of the Skaergaard intrusion, East Greenland. Part I: Chemistry and ore-microscopy 1

Raymond Chevallier, Suzanne Mathieu and E. A. Vincent: Iron titanium oxide minerals in layered gabbros of the Skaergaard intrusion, East Greenland. Part II: Magnetic properties 27

Paul K. Kuroda and E. B. Sandell: Geochemistry of molybdenum . . . 35

Book review:

"Nonradiogenic isotopes in geology" by Earl Ingerson (Reviewed by Kalervo Rankama) 64

Nos. 2/3

Malcolm Dole, G. A. Lane, D. P. Rudd and D. A. Zaukelies: Isotopic composition of atmospheric oxygen and nitrogen 65

Alfred J. Frueh, Jr.: The use of zone theory in problems of sulphide mineralogy 79

Henrich Neumann, Judson Mead and C. J. Vitaliano: Trace element variation during fractional crystallization as calculated from the distribution law . . 90

Julian R. Goldsmith and Fritz Laves: Potassium feldspars structurally intermediate between microcline and sanadine 100

F. Chayes: The lognormal distribution of the elements: a discussion . . . 119

L. H. Ahrens: The lognormal distribution of the elements (2) 121

Geochemical Research (prepared by T. F. W. Barth and Michael Fleischer)

List of persons doing research of interest to geochemists and their current work . . 132

Geochemistry in Japan 151

Geochemists of the U.S.S.R. 154

Book review:

"Geochemistry" by the late V. M. Goldschmidt (ed. Alex Muir)—reviewed by L. H. Ahrens 155

K. Przibram: Comment on an earlier paper by S. J. Thomson and G. Wardle . 156

No. 4

H. S. Yoder and H. P. Eugster: Phlogopite synthesis and stability range . . 157

Harmon Craig: Geochemical implications of the isotopic composition of carbon in ancient rocks 186

F. E. Senftle, T. A. Farley and L. R. Stieff: A theoretical study of star populations in loaded nuclear emulsions 197

Book review:

"Catalogue of Meteorites" by G. T. Prior (Reviewed by F. A. Paneth) . . . 208

G. Boato: The isotopic composition of hydrogen and carbon in the carbonaceous chondrites 209

Edward P. Henderson and Stuart H. Perry: A discussion of the densities of iron meteorites 221

Willi Dansgaard: The O^{18}—abundance in fresh water 241

W. Gentner and E. A. Trendelenburg: Experimentelle Untersuchungen über die Diffusion von Helium in Steinsalzen ünd Sylvinen 261

J. R. Butler: The geochemistry and mineralogy of rock weathering. (2) The Nordmarka Area, Oslo 268

Herbert H. Uhlig: Contribution of metallurgy to the origin of meteorites. Part I —Structure of metallic meteorites, their composition and the effect of pressure . 282

Book review:

"Minerals for the Chemical and Allied Industries" by Sydney J. Johnstone (Reviewed by C. F. Davidson) 302

Correction to a paper by H. G. Thode, R. K. Wanless and R. Wallough . 302
